Process Safety Consulting: Enhancing Management Systems and Regulatory Compliance

PSM/RMP Program Development and Implementation can be overwhelming. In addition, many organizations require additional resources to support existing process safety programs due to a lack of dedicated resources or spending cutbacks.

Don't Dismiss Stage 4 of an SIS Functional Safety Assessment!

The 2nd edition of IEC 61511 now requires – by use of the word “shall” – that a Stage 4 Functional Safety Assessment (FSA) be conducted during normal operation of a facility to ensure the SIS is providing protection and risk reduction against the hazards as designed and intended.

A Look Back at 25 Years of Learning and Growing at aeSolutions

"Give smart people the freedom to act and the safety to fail, and they will outperform the expectations placed on them." - Thoughts on aeSolutions' 25th anniversary by Ken O'Malley, one of aeSolutions Founders and President.
